**July is UV Safety Month** Who is at risk from eye damage from the sun? Yes, everyone (including children) is at risk for eye damage from UV radiation that can lead to vision loss. Any factor that increases the amount of time you spend in the sun will increase your risk. People who work or play in the sun for long periods of time are at the greatest risk. The risk of sun related eye problems is higher for people who spend long hours in the sun, have had cataract surgery or have certain retina disorders, are on certain medicines, such as tetracycline, sulfa drugs, diuretics and tranquilizers that increase the eye's sensitivity to light. If you have had cataract surgery, you may be more at risk of injury from sunlight unless the artificial lens you received during surgery absorbs UV rays. Please consult your Ophthalmologist or Optometrist, if you have concerns.

In another observance of our **Centennial**, we have a gift for each registered family – a car magnet printed in our gold and blue colors with our logo, our website and the mottos – "We Are Lourdes" and "100+ Years." Members of our Expansion Steering Committee will be distributing them during selected weekends—stay tuned for those dates. Initially we'll give one free to every registered family, and supply additional car magnets in the future if they are desired. One reason for these car magnets is to supply a way for parishioners to discover each other in the 160-plus ZIP codes we live in.
