2nd Sunday of November (11/09/14)

Blessed Daudi Okelo and Jildo Irwa
Catechists and Martyrs

The story of the precious lives of these young Ugandan martyrs is not well-known. These lay catechists were so young Ugandan martyrs is not well-known. These lay catechists were so young that we could correctly regard them as children, except for the fact that both children voluntarily walked into martyrdom. Both young men belonged to the Acholi tribe and were catechized by the Comboni Missionaries in 1915.

Daudi Okelo was born around 1902 to pagan parents in the village of Ogom-Payira. He received Christian instruction and baptism around age fourteen and immediately wanted to be a catechist. He could not wait to tell others about his new faith. In 1917 the local catechist died and Daudi petitioned the local priest, Father Cesare Gambaretto, for the position. He was ready to get started so Father Cesare assigned the young Jildo Irwa as his assistant.

Jildo Irwa was born around 1902 to pagan parents (his father would embrace the Catholic faith later) in the village of Bar-Kitoba. He was baptized by Father Cesae June 6, 1916, at about the age of ten. He and Daudi were confirmed on the same day, October 15, 1916.

Toiletries Needed Help our Lourdes Lunch guests by contributing travel size items for their hygiene kits during the month of November and December: Travel size soap, toothpaste, hand sanitizer and deodorant. Donations can be accepted by the church office during office hours from 9AM – 6PM.

November is Diabetes Awareness Month and an opportunity to raise awareness of the issues surrounding diabetes and its potentially devastating consequences. With nearly 346 million people worldwide affected by diabetes, the physical, emotional and financial impact is staggering. According to the Centers for Disease Control and Prevention, there are 26 million adults living with diabetes in the U.S. An additional 79 million adults – or one in four Americans – are estimated to have pre-diabetes, a precursor to Type 2 diabetes. Diabetes and pre-diabetes are closely linked to obesity and inactivity. If current obesity trends remain the same, by 2020 up to half of all adult Americans could be diagnosed with these conditions. So, what can we do about it? The good news is Type 2 diabetes, the most common type of diabetes (more than 95 percent of cases), can be prevented or delayed by simply changing your diet, maintaining a healthier weight and increasing physical activity.
